# 1 INTRODUCTION

## 1.1 THE TOURISM INDUSTRY

Tourism comprises the activities of persons travelling to and staying in places outside their normal place of residence and work for not more than one consecutive year, for leisure, business, and tourism related purposes.

With wind farm construction and tourism being one of the fastest growing economic sectors in the Province of Western Cape and Laingsburg, it is in the interest of the Laingsburg Local Municipality to facilitate the establishment of a range of tourist and holiday accommodation related establishments and facilities. Whilst the larger commercial establishments (like hotels or B&B) in the traditional business districts are essential to the tourism industry, the smaller establishments in residential areas also play a major role in providing a wide range of guest accommodation facilities.

## 1.2 BACKGROUND AND PROBLEM DEFINITION

A substantial proportion of guest accommodation establishments in Laingsburg are conducted by families/occupants from their residences. As with some other home occupations, residential based guest accommodation and commercial based guest accommodation have unique land use characteristics that require guidelines and regulations to manage and control any potential impact of the land use activity on its surrounding environment. While zoning regulations remain the most effective mechanism to manage and control, policies in support of these regulations can provide further guidance to public regulating authorities (in the exercising of discretion when considering applications for such activities), applicants and operators to ensure a uniform approach. The importance of formalizing this approach is further emphasized by the expected increased demand for tourist accommodation in future (because of the growth of the sector).

Since people are coming to Laingsburg in large numbers because of the wind farm construction and tourism, there is a high demand of guest and rental accommodation in the Town of Laingsburg. The related policies applying to various parts of the Town have continued to exist and be applied to varying degrees across the Town. To date, these have not been revised or integrated into a single uniform policy on a Town-wide basis. In the context of this, it is therefore the aim of this policy to provide a rational land use management framework to guide guest accommodation related land uses in support of existing and future zoning scheme regulations and set a uniform approach to assessment of guest accommodation related land use applications and land use activities and the exercising of discretion in this regard.

## 2 LEGISLATIVE CONTEXT AND LEGAL MANDATE

Land use management and the control over guest-accommodation establishments are dealt with mainly in terms of the legislation listed below. In order to set the context for this policy, it is important to understand the relevance of the following related legislation and policies. A fundamental principle in applying policy as proposed in this document is that policy cannot be inconsistent with regulations or any other existing law. Where a policy conflicts with any form of legislation, the latter therefore enjoys precedence.

### 2.1 South African Constitution, 1996 (Act 108 of 1996)

In Section 156(1) (read together with Schedules 4 and 5) of the South African Constitution, 1996 (Act 108 of 1996), municipal planning and land use management are designated as functions and competency of local government: *“(1) A municipality has executive authority in respect of, and has the right to administer - (a) the local government matters listed in Part B of Schedule 4 and Part B of Schedule 5; and (b) any other matter assigned to it by national or provincial legislation.”*

Policy is a mechanism at the hands of local government in support of the statutory development control function of the Laingsburg Local Municipality, Department of Technical Services, and Infrastructure in so far as guest accommodation related land usage is concerned.

In terms of Section 22, every citizen has the right to choose their trade, occupation or profession freely (i.e. the right to economic opportunity). Such trade, occupation or profession may however be regulated by law.

The “environmental guarantee” clause (Section 24) in the Bill of Rights section of the Constitution, states that every person shall have the right to an environment that is not harmful to their health or well-being, and to have that environment protected for the benefit of present and future generations, through reasonable legislative and other measures.

Therefore, in weighing up the rights and obligations conferred upon a guest accommodation enterprise owner and that of the general public, it is stated in Section 36 that any limitation on these rights (i.e. restriction of the number of rooms for tourists) must be reasonable and justifiable. This in turn requires that any such limitation must address the actual problem and that its purpose could not have been achieved through other less restrictive means. In support of Council’s land use management function, this policy must achieve an appropriate balance between these rights.

## **2.2 National Environmental Management Act, 1998 (Act 107 of 1998) (or NEMA in short)**

The act establishes principles for decision-making, acknowledging that all elements of the environment are linked and interrelated. Section 2 sets the principles to address the importance of the environment, with Section 2(4) focusing on sustainable development. Sustainable development requires the integration of social, economic and environmental factors in the planning, implementation and evaluation of decisions to ensure that development serves present and future generations.

Activities identified in terms of Section 24(2)(a) of the Act may not commence without environmental authorisation from the competent authority after an investigation and assessment of the potential impact in terms of Regulations 22 to 26 of the Environmental Impact Assessment Regulations (2006), as promulgated in terms of Section 24(5) of this Act. Although components of other guest accommodation categories may also trigger it, resorts, lodges and hotels or other tourism and hospitality facilities situated in protected areas require environmental authorisation in terms of the Act.

## **2.3 Spatial Planning and Land Use Management Act 16 of 2013**

The general purpose of the SPLUMA is to provide national, provincial, and municipal spheres of government with a framework relating to the establishment of policies and systems relating to planning and land use management. The act provides five main development principles that guide all authorities responsible for implementing any by-law or policy on land development. Section 24 of the act requires that Municipalities must, after public consultation, adopt and approve a single Land Use Scheme for its entire area. The main purpose of the scheme is to control and regulate land use and development within the entire area of the Municipality. Municipalities are also empowered to approve applications for development in terms of Municipal Land Use Scheme and related legislations and policies. The scheme covers the entire area of the municipality including the areas that were not subject to land use management tools eg. Agricultural areas, mining areas, and rural areas.

## **2.4 Existing Zoning Scheme regulations**

Zoning of land determines the use rights attached to a particular land unit (eg residential, business, industrial, etc). Zoning also outlines the parameters within which land may be developed (eg height of buildings, building lines, etc). Zoning therefore shapes the built and natural environment and aims to protect and upgrade the general welfare, public health and safety of the inhabitants of the municipal area.

A fundamental principle in applying policy as outlined in this document is that policy must conform with existing zoning scheme regulations. Where a policy conflicts with a zoning regulation, the latter shall enjoy precedence.

For a list of zoning schemes that currently exist within the jurisdiction of the Laingsburg Municipality, refer to Annexure B.

## **2.5 Western Cape Provincial Spatial Development Framework (2009) (or PSDF in short)**

The Provincial Spatial Development Framework (PSDF) provides a broad overarching set of development principles and guidelines for the Western Cape Province. According to the PSDF, all land in the Province falls in one of the following land use designations, namely Core, Buffer, Intensive Agriculture, Urban Edge or Urban Development Areas.

A resort is the only land use category of this policy addressed in the PSDF in detail. In terms of the PSDF, single title resort units are not supported outside the urban edge, and will only be considered under exceptional circumstances, and then only if at least 50% of the development consists of leasehold resort units.

## **2.6 Guidelines for Resort Developments in the Western Cape (Dec 2005)**

In terms of the Guidelines for Resort Developments in the Western Cape, a unique resource has to be available for the purposes of resort establishment outside the urban edge. This resource can be of a natural or man-made origin, but it should advantageously distinguish the subject property from other properties in the immediate and larger area

## 3 POLICY RATIONALE AND PRINCIPLES

### 3.1 JUSTIFICATION FOR A POLICY

Disparities currently exist in the implementation of guest accommodation related land use applications within the area of Laingsburg Municipality. This can be attributed to several reasons, including:

- different land use management approaches and policies by previous administrations relating to this land use phenomenon;
- historic differences created by a range of existing zoning scheme provisions;
- location/area specific requirements; and
- a lack of provision for certain land use categories as a result of new land use trends (i.e. bed and breakfast, backpackers lodge, spa/hydro, etc).

It is further Council's responsibility to balance the needs of its residents with that of the need to enable local economic opportunities through supporting the guest accommodation sector. Attempting to replace these previous disparate approaches and policies, this policy is therefore considered justified.

### 3.2 BASIC UNDERLYING PRINCIPLES

This policy is based on the following underlying principles:

- Compliance with and conformance to other existing legislation, eg zoning schemes
- Promotion and safeguarding of the amenity and quality of life enjoyed by residents in local areas through appropriate land use controls
- Balancing the need for access to economic opportunities and support of / guidance to the guest accommodation industry with the above
- Promoting a responsible and sustainable approach to facilitating guest accommodation opportunities
- Clearly stating Council's land use requirements for establishments in the guest accommodation industry

## 4 SCOPE AND APPLICATION

### 4.1 AREA OF APPLICATION

This is a land use management policy to guide the effective and responsible development of guest accommodation establishments in Laingsburg. When adopted, this policy will apply within the entire area of Laingsburg Local Municipality as guidelines for the assessment of proposals for guest accommodation establishments. This policy addresses both business and leisure / recreational related forms of guest accommodation.

### 4.2 EXISTING ZONING SCHEME REGULATIONS

Where an existing zoning regulation prescribes standard development parameters (i.e. height, building lines, parking), this policy does not replace these similar provisions, but is applied where such a provisions does not exist, or in addition to such provisions. Where similar land use categories (i.e. bed and breakfast, guest-house) do exist in existing zoning schemes, this policy is applicable to the extent that it is not in conflict with these regulations. Refer to Annexure B for a summary of the existing schemes.

Forming part of a suite of land use management policies as part of Council's Land Use Management System, this policy only deals with land use management and related regulatory aspects. Beyond the provision of land use guidelines for assessing proposals and establishing and managing such enterprises, the policy does not get involved in any other sectoral support or economic development strategies and initiatives.

## 5 OUTCOME AND OBJECTIVES

A policy serves as a framework of pro-active guidance, determines a course of action and facilitates decision making. The overall intended outcome of this policy is to provide coherent land use management guidelines for guest accommodation establishments that will facilitate appropriate land use and development.

Specific objectives of this policy include:

- creating an uniform point of departure;
- providing appropriate guidance for landowners, applicants and developers in formulating proposals;
- guiding assessors and decision makers in exercising their discretionary powers;
- informing the current process of developing a unified Laingsburg Zoning Scheme and supplementing and supporting the subsequent implementation thereof;
- setting equitable standards across the Town of Laingsburg by establishing uniform assessment criteria, definitions, land use guidelines and development parameters;
- facilitating economic development and access to economic opportunities in balance with social and environmental integrity and sustainability and
- facilitating orderly development.

## 6 POLICY

### 6.1 ACCOMMODATION TYPOLOGY

For the purpose of this policy, guest accommodation establishment categories identified are set out below. Note, these categories are for the purposes of grouping together sets of assessment criteria and guidelines and are not to be confused with land use types and zones (or their ancillary uses) specified in a zoning scheme (or the land use types set out in the Laingsburg Zoning Scheme).

P = Primary use (permitted without need to first obtain Council's consent)

A = Additional use rights (permitted as of right, subject to compliance with standard conditions / provisions)

C = Consent use (permitted in terms of the provisions of a particular zone, only with Council's consent)

\*C= Consent use, as part of Tourist Accommodation definition

In addition, and set out in the next section as part of the policy guidelines, the Laingsburg Municipal Integrated Zoning Scheme also contain a number of detailed provisions relating to various guest accommodation establishment types. With the exception of typical development parameters, these are included in the criteria and guidelines set out in Section 6.3 below.

### 6.3 ASSESSMENT CRITERIA

The table below provides an explanation of the land use criteria on the basis of which the policy guidelines are set out. Guidelines are set out for each of the 7 accommodation categories identified in section 6.1 above.

CRITERIA	EXPLANATION
Purpose	Explanation of what the land use entails and what types of land use activities are associated with the land use.
Scale	Description of the typical scale of the development as determined by its physical size (i.e. height, coverage, floor area ratio) and the number of occupants/guests (i.e. beds, staff, rooms).
Location	Description of the desirable characteristics of the location and of the land use.
Self-catering	Clarification of the use of self-catering facilities.
Liquor use	Clarification regarding the serving of alcoholic beverages.
Ancillary facilities	List typical ancillary facilities that can be used by guests.
On-site residence of management	Clarification regarding permanent residence of the owner or management.
Parking	Parking requirements, off-street and on-street.
Loading	Provision for loading and/or deliveries.
Staff facilities	Provision of staff facilities and accommodation.
Signage	Size and location of outdoor signage.
Environmental / heritage impact	Mitigating the impact of the land use on the surrounding environment.

The following guidelines augment existing zoning scheme provisions and are to be applied in the assessment of development applications in terms of the current zoning schemes. In addition, they will also assist in formulating appropriate conditions or restrictions to be imposed where such applications are approved.

## 7 COMMENCEMENT AND IMPLEMENTATION

### 7.1 TRANSITIONAL ARRANGEMENTS

Once adopted and during the transitional period (the interim period before the LMIZS is adopted and promulgated), this policy can only be applied to the extent that it doesn't contradict existing zoning scheme regulations, or where an application for additional rights / land use change is being considered. Once the LMIZS is introduced, it will only be applicable insofar as guest accommodation establishments are not already permitted as of right and will thus remain guidelines to be applied in applications for additional land use rights or land use change, whether by rezoning, consent or departure.

### 7.2 COMMENCEMENT DATE

Draft Guest House Policy to be submitted to Laingsburg Municipal Council for approval or adoption. Implementation will commence on the same date.

### 7.3 NON-COMPLIANCE

Where appropriate, the provisions of this policy will be incorporated into conditions of approval of land use applications for guest accommodation establishments. Where, in Council's opinion, any contravention of such conditions of approval occurs, enforcement thereof will be undertaken in terms of the provisions of the relevant applicable planning legislation, eg LUPO. This may include serving a written notice on the alleged offender, requiring such person or persons to rectify the contravention. The persons on whom such a notice is served must comply with such directive within the time period stipulated, failing which, Council may proceed to prosecute any such offender in a Court of Law.

### 7.4 POLICY REVIEW

This policy should be reviewed once the LMIZS has been implemented.
